

## GGS Straw Log

GGS Straw Sediment Control Log is composed of 100% clean, certified weed free straw fiber matrix confined by a synthetic net to form a log of a specific diameter. GGS Straw Logs are designed to reduce hydraulic energy and filter sediment laden flow in channels and on slopes. The logs are flexible to conform to the soil surface and are secured by staking. GGS Straw Logs meet or exceed the physical property values listed below:

Diameter	Per 10 Ft Length
9 inch	14.0 lbs 1.4 lbs/ft 3.3 lbs. cu ft
12 inch	25.0 lbs 2.5 lbs/ft 3.3 lbs/cu ft
20 inch	50.0 lbs 5.0 lbs/ft 2.4 lbs/cu ft

Composition and Netting	
Fiber Composition	100% Clean, Certified Weed Free Straw
End Closure	Hog Ring or Tied
Netting	0.50" X 0.50" Heavy Duty Synthetic
Configuration	Cylindrical with Closed Ends
