

GGs Staked Turbidity Barrier

Staked Turbidity Barriers are continuous panels of 18 oz. yellow vinyl-polyester fabric that, installed correctly, can contain stormwater runoff or redirect the flow. Installation is similar to that of silt fence with 8" below the grade. The curtain has a heat sealed hem along the top edge and is approximately 44.5" wide.

Property	Test Method	Unit	M.A.R.V
Weight (typical)	ASTM D 3776	oz/sy	18
Grab Tensile	ASTM D 5034	lbs/sq in	281 x 247
Tongue Tear	ASTM D 2261	lbs/in	51 x 45
Adhesion	ASTM D 751	lbs/sq in	20
Cold Crack	ASTM D 2136	deg F	-4
Finish			matte
Fire Retardant	Self Extinguishing		pass
